

TABLE OF CONTENT

1. Overview of basics	7
2. Reinforcements	13
3. Matrices	31
4. Semi-products	39
5. Processing thermoset composites	51
6. Sandwich construction	125
7. Processing thermoplastic composites	135
8. Finishing processes	155
9. Applications	169
10. Techno-economic data	197
11. Recycling	209
12. Composite business	211
13. Appendix – Inorganic matrix composites	215

For each process, the following details are provided:

- Constituent materials,
- Principle of the process advantages and disadvantages,
- Production equipment – moulds, machines, etc,
- Specific processing aspects,
- Standard operational characteristics part size, production output, scrap, typical series, etc,
- Typical and out-of-the-ordinary applications,
- Developments,
