

COMPOSITE MATERIALS IN ENERGY

Table of contents

I - Executive Summary	5
II - Structure of the composite industry in 2005	7
1 - Overall composite industry structure	7
2 - Overview of the composites for Windmills applications	11
a) Industry quantification	11
b) Economics	11
c) Strong concentration of the market in final processing	13
d) Final product manufacturers' integration in composite processing	13
3 - Main recent historical trends for Windmills applications	15
a) Strong past growth in volume mainly in Europe and Asia-Pacific	15
b) Strong rise in resin prices, fibreglass prices steady	17
c) Strong growth of carbon fibre volume and price	19
4 - Overview of the composites for other Energy applications (pipes and tanks)	22
III - Main dynamics and vision of the composite industry in 2012-2015	23
1 - Main dynamics for Windmills applications	23
a) Limited future substitution	23
b) Consolidation and structure of the industry	24
c) Future growth in volume and in value	28
d) Positive trend for carbon fibre and automated processes	29
2 - Other issues	31
a) Impact of the regulation	31
b) Nanocarbon	31
IV - Glossary	35
V - Case studies*	36
1 - Market data	
A - Brazil: Amitech leads the way	36
B - Asia / Wind Energy: Asia now in second place for new installations.....	39
2 - Trends	
Asia / Wind Energy: The Asian market had exceeded all estimations.....	41
3 - Applications	
Vertical axis wind turbines: a relevant solution for urban areas	44
