

# COMPOSITE MATERIALS IN MARINE

## Table of contents

<b>I - Executive Summary</b>	<b>5</b>
<b>II - Structure of the composite industry in 2005</b>	<b>7</b>
<b>1 - Overall composite industry structure</b> .....	<b>7</b>
<b>2 - Overview of the composites industry for Marine applications</b> .....	<b>10</b>
a) Industry quantification .....	10
b) Competitive environment .....	12
c) Economics .....	13
<b>3 - Main recent historical trends</b> .....	<b>15</b>
a) Strong past growth thanks to Asian-Pacific demand .....	15
b) Strong rise in resin prices, fibreglass prices steady .....	16
<b>III - Main dynamics and vision of the composite industry in 2012-2015</b>	<b>18</b>
<b>1 - Main dynamics</b> .....	<b>18</b>
a) Decrease in composites penetration due to rationalisation of the industry .....	18
b) Consolidation and structure of the industry .....	19
c) Future growth in volume and in value .....	20
<b>2 - Other issues</b> .....	<b>22</b>
a) Impact of the regulation .....	22
b) Nanocarbon .....	23
<b>IV - Glossary</b>	<b>25</b>
<b>V - Case studies*</b>	<b>27</b>
<b>1 - Market data</b>	
The Chinese yachting industry in 2007/2008 .....	27
<b>2 - Raw materials</b>	
<b>A - The benefit of balance</b> .....	30
<b>B - Influences on the mechanical properties of warp-knitted fabrics</b> .....	32
<b>3 - Processes</b>	
<b>A - Infusion moulding has no secrets for Hatteras Yachts</b> .....	38
<b>B - Development of operational monitoring sensors for the Veolia racing monohull</b> .....	41
<b>4 - Applications</b>	
Innovative composite propellers .....	45
