

CONSTRUCTION AND ENERGY FORUM

PIPES & TANKS

CORROSION & MAINTENANCE

INFRASTRUCTURES: NEW SOLUTIONS FOR ASIA

THURSDAY, OCTOBER 23 RD, 2.30PM / 5PM

Moderator

**National University of Singapore,
Kiang Hwee TAN, Associate Professor,
Department of Civil Engineering**

Prof. Tan obtained his doctorate degree from The University of Tokyo, Japan in 1985. He has published more than 160 refereed papers in the field of structural engineering. He is a member of the Editorial/Advisory Board for nine international journals including the ASCE Journal of Composites for Construction (USA), Cement and Composites (UK), JCI Journal of Advanced Concrete Technology (Japan) and KCI International Journal of Concrete Structures & Materials (Korea). Prof Tan was the founding president of the FRP Society (Singapore) and the organising chairman for the 6th International Symposium on FRP Reinforcement for Concrete Structures (FRPRCS-6), held in Singapore in 2003. He is a Fellow of the Institution of Engineers, Singapore, in which he served as Honorary Secretary from 2004 to 2006.

TABLE OF CONTENTS

1	Protecting coating and lining with composites	3
	PLA, Plastic, Lining Association, Mr. Kanemasa Nomaguchi, President	
	- Case study: sustainable water management in response to 21st century pressures	
	o Corrosion and waste water system	
	o Strategy action points	
	o Corrosion control maintenance	
	o Maintenance processes	
2	Corrosion resistant Vinyl ester resins	21
	CRAY VALLEY, Mr. Jeongwoo Jeon, Technical Manager for VE, UPR and Gel coats	
	- EPOVIA KAYAK® series: an answer to the balance of high corrosion resistance and improved physical product performance	
3	Phenolic grating for emerging applications	33
	Chinagrate, Mr. Steven Zhao, President	
	- When FST (Fire, Smoke and Toxicity) is of concern, phenolic grating is the ideal choice	
	- Saving weight and saving energy with phenolic grating	
	- Phenolic grating in offshore applications	
4	Bamboo Pole composite	41
	Mahindra Composites Ltd, Mr. Nachiket Thakur, Head, Product Design & Development	
	- Infrastructural overview	
	- Why bamboo	
	- Manufacturing process	
	- Characteristics and applications for rural and disaster housing	
5	Advantex™ glass fibre reinforcements for durable structural composites applications	57
	3B Fiberglass, Mr. Luc Peters, Application Development Manager	
	3B Fiberglass, Mr. Olivier Caro, Product Engineer	
	- Durability for the development of structural applications: pipes, chemicals storage tanks, pultruded profiles, pressure vessels, electrical insulators, concrete reinforcement.	
	- Deliver improved corrosion resistance and durability over standard E glass	
	- Long term stress and strain corrosion tests will be presented in the field of infrastructure, building and construction markets	
6	Mechanical properties and non-destructive characteristics for Wind turbine blade using full-scale static test and acoustic emission	73
	Doosan Heavy Industries & Construction Co., M. Lee Sang-II, Principal R&PD Engineer, renewable Energy Development Team	
7	Material Challenges For the Future of Wind Turbine	85
	Vestas Wind Turbine, Mr. Srikanth Narasimalu, Technical director of the research and development department
