

# BUILDING AND CONSTRUCTION FORUM

TUESDAY, MARCH 24 2009

10:30 AM – 1:30 PM

## BUILDING & CONSTRUCTION APPLICATIONS: A NEW ROLE FOR COMPOSITES

### Moderator

● **AICO (Associazione Italiana Compositi per le Costruzioni)**. Angelo Di Tommaso, President of the AICO, Professor at Università IUAV di Venezia.

Civil engineer and professor of "Scienza delle Costruzioni" in Italian universities. He has been lecturer at the universities of Naples, Florence and Bologna. Now at "Università IUAV di Venezia", professor of Structural Mechanics and director of "Scienza delle Costruzioni" laboratory LabSCO, chairman of the AICO since establishment (1996).

In partnership with :

## TABLE OF CONTENTS

### *BUILDING AND CONSTRUCTION MARKET OVERVIEW*

<b>1</b>	<b>FRP Composites for the UK Housing Market</b>	<b>3</b>
●	<b>NetComposites UK. Dr Sue Halliwell</b> , Technology Transfer Manager	
	- Current state of the UK housing market and challenges it faces	
	- Review of FRP composites and current applications in housing	
	- Developments overseas, particularly in the US, and potential impact on the UK industry	
<b>2</b>	<b>Innovation in Advanced Composite Materials for Civil Engineering and Architectural Applications</b>	<b>19</b>
●	<b>Fidia S.r.l. Technical Global Services, Italy. Dott Ing Paolo Casadei</b> , Ph.D., Technical Director Research and Development	
	- Comparison between existing and new advanced composite materials for civil engineering and architectural applications: developments and future applications	
	- Case studies of retrofit-strengthening applications using FRP on existing structures-infrastructures and monumental buildings	
	- Case studies of new constructions using advanced composite materials from reinforced concrete to full FRP structures	

### *SYSTEMS RESISTANT TO ENVIRONMENTAL DEGRADATION*

<b>3</b>	<b>Application of New "Fit For Use" Materials in Building and Construction Market</b>	<b>79</b>
●	<b>nedcam. R.M. Homan</b> , Commercial Director	
	- Reach out to the building and construction market to bring in business	
	- Two case studies: Texaco petrol stations and Dublin bridge	
	- New opportunities in materials and systems for the building industry	

### *NEW CLADDING SYSTEMS*

<b>4</b>	<b>A New Lightweight Sandwich Composite Cladding System</b>	<b>103</b>
●	<b>DIAB Group AB. Peter Norlin</b> , Manager, Structural Design - Europe	
●	<b>Skandinaviska Glassystem AB. Abrahamsson Stefan</b>	
	- Design and engineering of the modules, eliminating steel latticework	
	- Development of the manufacturing process	
	- First use of the modules on a six storey office block in Copenhagen, Denmark	

### *AUTOMATING MANUFACTURING*

<b>5</b>	<b>A Revolutionary Process for Interior and Exterior Construction Elements</b>	<b>137</b>
●	<b>Acell S.p.A. Mr Albertelli</b> , President	
●	<b>Acell S.p.A. Michael Frieß</b> , Business Development Director	
	- Monolithic SMC panel produced in a one-step moulding process	
	- Product application and performances	
	- Acell's business model	

### *RENOVATING OLD BUILDINGS*

<b>6</b>	<b>Two Cases of Retrofit with Composite Materials for Historical Buildings</b>	<b>151</b>
●	<b>PRAS. Massimo Calda</b> , Managing Partner	
	- FRM applied to 18th century masonry vaults, heavily cracked and loaded: works and tests	
	- FRP applied to 20th century reinforced concrete frames, lightly reinforced and with poor-quality concrete: works and tests	
<b>7</b>	<b>FRP Technology Applied to Historical Buildings: Static and Seismic Improvement. The Case of Mozzi-Bardini Palace in Florence</b>	<b>161</b>
●	<b>Maxfor srl, Italy. Dott ing Giorgio Giacomini</b> , Chief Manager	
	- "Composite FRP technology" for preserving a cultural heritage palace	
	- Anchorage systems with fibre device validated by university tests
