

AUTOMOTIVE & MASS TRANSPORTATION

FRIDAY, OCTOBER 16

10:30 AM – 1:30 PM

VIRTUAL, LIGHTER AND GREENER COMPOSITES SOLUTIONS

M Moderator

● TOYOTA Auto Body Co., Ltd

Dr. Nishimura Takuya, Project Manager

Present-2007/Feb.: TOYOTA AUTO BODY CORPORATION - 2007/Jan-2006/Feb.: TOYOTA MOTOR CORPORATION - 2006/Feb-2005/Oct.: TOYOTA AUTO BODY CORPORATION - 2005/sep.-2001/sep.: ARACO CORPORATION - 2001/March-1998: University of Bath, Material Science, Research officer - 1998/March.: Doctor of Agriculture - The University of Tokyo.

TABLE OF CONTENTS

THE VIRTUAL VEHICLE

1 The Effect of Recession on the Automotive Industry in the Emerging Markets **3**

● **BCH. Mrs. Ritika Gupta**, Executive Director

- An overview of the Automotive industry with comparisons of different markets
- Recession and its effects on the global automotive industry.
- Positive and Negative impact of recession on different emerging markets
- Future trends and the way forward

2 The Virtual Vehicle: Case Studies in NVH, Durability, Safety and Handling **7**

● **Msc. Software Asia. Mr. Winston Vigil**, Technical Lead Manager

- The simulation process: Components, Sub systems, systems
- The Design Synthesis and Design Validation Processes
- Optimization with Virtual Product Development

NEW PROPERTIES & APPLICATIONS

3 One single instrument for multiple capabilities in composite dynamic testing **9**

● **On dB-Metravib / DMA Division. Mr. Arnaud Favier**, International Sales Manager

- DMA Products and Consulting
- Dynamic Mechanical and Rheological properties
 - Formulation and reinforcement
 - Optimization of curing process
 - Ageing and lifetime prediction
 - Case studies

4 Case studies: Innovation in composite CNG Cylinders, High Performance Reinforcement for vehicle up armouring **23**

● **OCV (Thailand). Co. Ltd. Mr. Thierry Deconninck**, High Performance Reinforcements Technical Support, Asia Pacific

Case Study 1: How innovative High-Performance Fiberglass participates to the mass development of CNG cylinders

● **OCV (India). Mr. Jitendra Godse**, Country Leader (Technical Services High performance Reinforcements) **33**

Case Study 2:

- Newly developed High performance reinforcements imparts composites unique blast and ballistic protection properties.
- Stronger, Lighter and Affordable structural and Armor solution

5 Large area vapor grown carbon fiber mats for use in highly thermally conductive composite heat spreaders **41**

● **National Cheng Kung University. Prof. Jyh-Ming Ting**, Materials, Science & Engineering Department

ENERGY SAVINGS

6 Energy saving strategy in transportation by CFRP **43**

● **The University of Tokyo. Prof. Dr. Eng. Jun Takahashi**, Department of Systems Innovation, School of Engineering

- Global energy saving strategy in transportation
- Effect of weight lightening on energy saving of gasoline and/or electric vehicles
- Research trend of CFRP and CFRTMP for airplane and automobile applications

7 The latest application of the foam cored sandwich structure in China automotive and railway car **57**

● **Evonik Degussa Co., Ltd. Mr. Hu Pei**, Director, Film and Foam Product, Asia Pacific

- The introduction of the cored sandwich structure
- Sandwich parts in the light weight fuel cell car
- Sandwich parts in the railway car

THE BIO CAR

8 Development of car components using Natural Fibres and a new evolution in biomaterials **73**

● **TOYOTA Auto Body Co., Ltd. Dr. Nishimura Takuya**, Project Manager

- Development of car components including car body parts with natural fibre
- The COMS-BP concept car, a small electric vehicle using bio plastics as car body parts
